Professional Summary

Frontend developer with 6+ years of experience shipping production web and mobile applications. Specializes in converting Figma and UI/UX designs into working features with Vue.js, Aurelia.js, and TypeScript. Experienced in AI-assisted development, having adopted Claude Code and GitHub Copilot in daily work and led their team-wide adoption.

Work Experience

Senior Frontend Developer

CAPLINQ Corporation (now Krayden)-Alabang

November 2023 to Present

First frontend hire; the team has since grown to six frontend developers, three backend developers, two UI/UX designers, and the CTO. Carried the largest share of the company's full v1-to-v2 platform rewrite in Aurelia.js and TypeScript at a pace of about two major modules per month, and built the shared component library used across the product. Review the team's frontend work and integrate APIs across the redesigned platform; with no QA team, developers own quality end to end. Introduced Claude Code and GitHub Copilot into the development workflow after making the case to leadership.

Senior Frontend Developer (*Part-time*)

Avvoka-London, England

June 2025 to August 2026

Worked part-time for a year on the six-person frontend team of a legal-tech AI company. Fixed bugs across a large internal application and migrated legacy Rails ERB templates to Vue components.

Frontend Developer

IT Americano Inc-Makati

July 2023 to October 2023

Mid-level frontend developer on a six-person engineering team maintaining a complex live casino platform. Shipped new in-game features and WebSocket-based live updates, and reviewed frontend colleagues' code.

Frontend Developer (*Contract*)

Cashbee Lending Services, Metro Manila-Muntinlupa

January 2023 to June 2023

Six-month contract as the sole frontend developer on a five-person team. Built an iOS lending app — a rebuild of the original Cashbee product — and shipped it to the App Store, while maintaining the existing Android and iOS apps (1,000+ downloads) in close collaboration with QA on functionality and reliability.

Software Developer

Bizmates Philippines Inc., Muntinlupa City, Metro Manila-Muntinlupa

January 2020 to December 2022

Sole frontend developer on the four-person GitTap team. Built the UI and API integration for an IT job-matching platform for Japan as it grew to its first 200–300 production users, merging five to seven features or fixes to production per month. Also contributed to the Bizmates English-training platform.

Desktop Support Engineer (*Internship*)

AllValue Holdings Corp., Muntinlupa City, Metro Manila-Alabang

May 2018 to November 2018

- Part of a two-person support team covering 100–200 employees.
- Set up and configured laptops for new employees daily.
- Diagnosed and resolved hardware, network, and POS system issues.
- Configured antivirus software and fixed printer issues.

Skills
